
Hardman Johnston Large Cap Equity

2018 SECOND QUARTER REPORT

**Hardman
Johnston**
Global Advisors

COMPOSITE PERFORMANCE (%) (period ending June 30, 2018)

	2 nd QTR	YTD	1 Year	3 Years	5 Years	10 Years	Inception
Large Cap Equity (gross of fees)	4.05	4.18	13.10	11.85	13.66	10.79	11.35
Large Cap Equity (net of fees)	3.90	3.89	12.47	11.22	13.01	10.14	10.94
S&P 500 Total Return Index	3.43	2.65	14.37	11.87	13.35	10.11	9.69

Performance is preliminary through June 30, 2018. Periods greater than one year are annualized. **Past performance does not guarantee future results.** Net performance reflects the deduction of advisory fees. Composite inception date: December 31, 1989.

KEY TAKEAWAYS

- Volatility persists as cycle lengthens and trade tariff dispute intensifies
- US companies return excess cash to investors following tax cuts
- Interest rate rises and increasing oil prices pressure businesses and consumers
- The Financials and Energy sectors were the largest contributors to performance in the second quarter; Occidental Petroleum Corp. (+30.0%) and Automatic Data Processing, Inc. (+18.8%) were the top contributors

MARKET REVIEW AND OUTLOOK

It would be wrong to read too much into a mere three months of stock market activity, but it does feel like things are getting back to normal in US markets after a couple of years of relentless strength, followed by one quarter of dramatic volatility. The second quarter saw the return of some healthy tension between buyers and sellers, the mechanism required to make sure that prices are set appropriately. Policy initiatives from the executive branch in Washington D.C. have created some uncertainty, most importantly around trade policies and the threat to global supply chains, but tailwinds continue to outweigh the headwinds in most investors' eyes. In the meantime, governments around the world are warily watching what happens in the US, fully understanding the risks from misjudging the actions and reactions to US policy changes.

The United States economy is strong, continuing its acceleration from the tepid expansion out of the Great Recession. In spite of the many concerns about disruptions to global growth, business confidence is high, and hiring remains strong. Wages are steadily moving up at a moderate rate, which in turn has helped consumer confidence and has helped sustain consumer spending. The labor force is growing as more people come back to work, and productivity is accelerating. Both of those very positive factors will help keep inflation in check. Bank lending standards are relaxing once again, allowing businesses and consumers to fund their growth with relatively cheap money, although interest rates are rising. In general, the US environment is positive, for the time being.

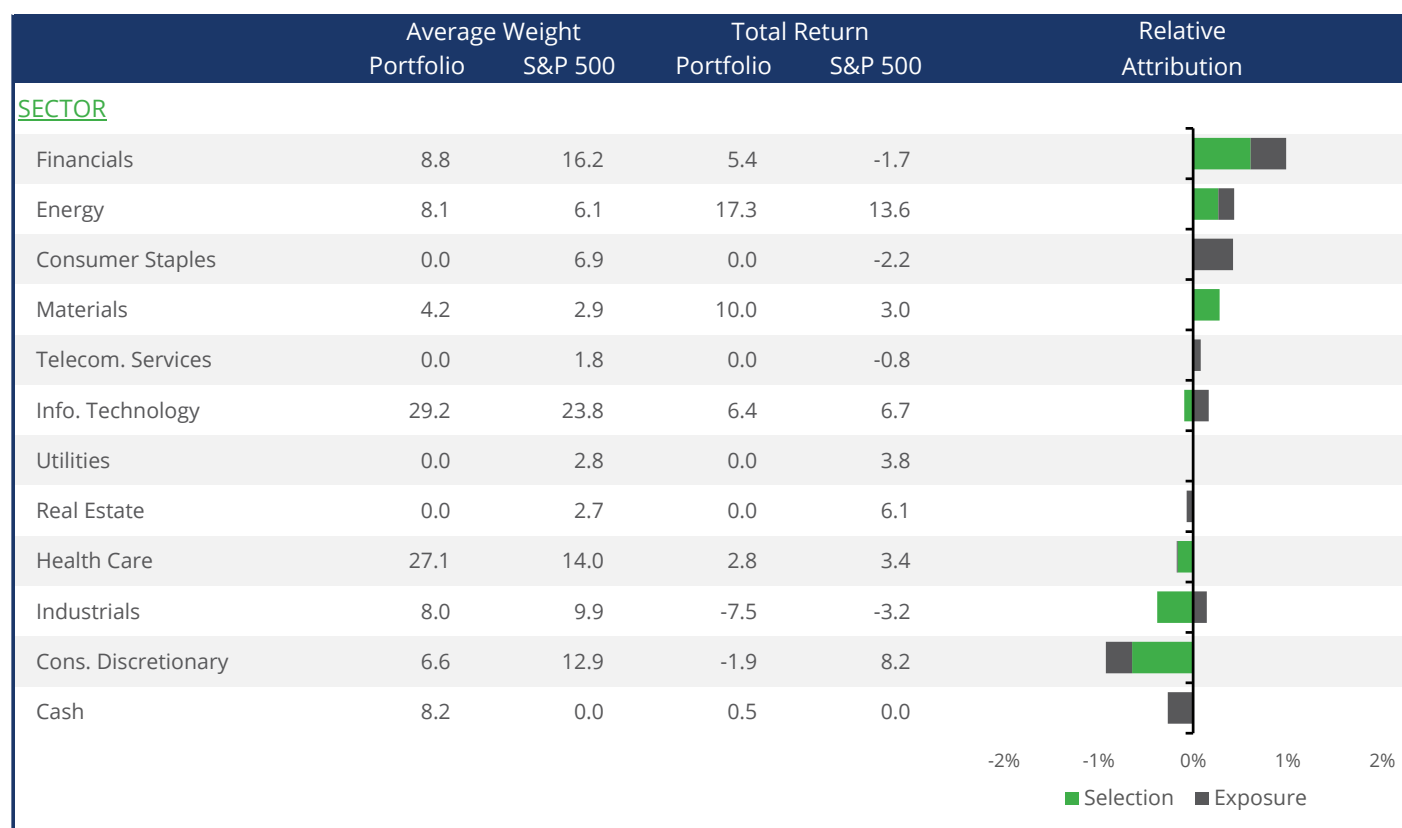

There are significant risks to the strength. Foremost in the press and therefore most people's minds is the risk of trade wars, driven by the US unilaterally imposing tariffs. In the near term it could be very disruptive to supply chains, drive inflation, and impede the long term investment decisions necessary to drive the economy into the future. We hope the policies end up being nothing more than a negotiating tactic, and that the recent proposed concessions from the European Union on auto tariffs are a sign that mutual damage can be avoided, but are watching all developments closely.

While the US and North America are usually the most important end markets for our portfolio holdings, most companies have significant opportunities and growth outside the home market. Risk is always the companion of opportunity, and we are therefore monitoring the slowing growth in parts of Europe, Latin America, and Asia. After years of accommodative monetary policies, central banks around the world continue to navigate the perils of unwinding those positions. As we have

highlighted for years, the timing and sequence of taking away these extraordinary measures is uncharted territory for all of us.

In sum, we continue to look to the US as the best source of stable growth for the time being, but feel that selectivity is more important than ever. Detailed analysis at the company level is necessary to identify holdings that can navigate both changes in government policy and a dynamic economic environment to both grow and maintain their competitive advantage. We remain confident that the portfolio, built for the long term yet able to weather near term headwinds while taking advantage of opportunities, will serve our investors well.

PERFORMANCE ATTRIBUTION: 2Q 2018

Preliminary data as of the period ending June 30, 2018. Source: FactSet, Hardman Johnston Global Advisors LLC®. **Past performance does not guarantee future results.** The data shown is of a representative portfolio for the Hardman Johnston Large Cap Equity strategy and is for informational purposes only. Exposure refers to the contribution of the active segment weights to the total relative return. Results are not indicative of future portfolio characteristics/returns. Actual results may vary for each client due to specific client guidelines and other factors. PORTFOLIO COMMENTARY

The HJGA Large Cap Equity Composite delivered 3.90% net returns compared to 3.43% for the S&P 500. Top drivers of performance included Occidental Petroleum Corp., Automatic Data Processing, Inc. and Adobe Systems, Inc. Occidental has a strong position in domestic energy supply, and plays an increasing role in helping the United States capitalize on a renaissance in manufacturing as a key upstream supplier of fuels and intermediate chemicals for a broad range of applications. Investors are appropriately bullish about ADP's prospects given increasing domestic employment and their role in helping employers not just process their payroll, but also administer benefits and comply with a growing array of labor regulations. Adobe continues to help its clients with the shift from traditional to digital media. Most are familiar with the prosaic PDFs that Adobe software creates, as well as Photoshop, the most popular photo editing package, but relatively few understand how important their Creative Suite software and associated services are to marketing professionals and executives.

Detractors in the quarter included Stanley Black & Decker Inc., Fanuc Corp., and Prysmian S.p.A. Concerns over tariffs as well as rising mortgage rates combined to prompt a selloff in Stanley. Revenue and profit growth projections look solid for the next few years, but the re-rating is understandable given the tumultuous international trade backdrop. Concerns about tariffs and their impact on the auto industry also played a major role in Fanuc's pull-back in the quarter. Fanuc's robotic manufacturing systems are pervasive in the auto industry, and a potential slowdown in orders weighed on the stock. Prysmian faced some delays and over-runs in an ambitious power transmission project in Europe. They remain a technology leader in electrical and telecommunications transmission cables.

PORTFOLIO ACTIVITY

Portfolio turnover remained low. We sold our position in Shire Pharmaceuticals due to slowing growth and initiated positions in Wuxi Biologics and Hexagon AB. Wuxi is helping its biopharmaceutical customers penetrate the vast and underserved Chinese markets with development, trial, and marketing services. Hexagon serves a number of heavy industries with its industrial software applications. As labor markets tighten the efficiencies that Hexagon helps its customers achieve are essential to improving productivity.
