

- Firm:** We are an independent, global equity boutique investing in high-quality growth companies at value prices.
- Philosophy:** We believe earnings growth drives stock performance over time and that there are short term inefficiencies in the market that can create attractive entry points. For more than 35 years, we have followed a focused and disciplined investment process that results in concentrated, high conviction portfolios with high active share.
- Strategy:** We apply a systematic and disciplined approach designed to identify high-quality companies with forward-looking secular EPS growth of at least 10% per annum over the next three to five years when they are trading at an attractive valuation. The portfolio will invest in 20 to 30 companies located outside the United States, diversified by industry and country.
